PROJECTS

Travel Advisor   **Apr 2025 - May 2025**

- Built a location-based travel app using React and Google Maps/Places APIs to display nearby restaurants, hotels, and attractions.
- Implemented real-time filtering, geolocation, and dynamic map rendering for enhanced UX.
- Used RESTful API integration and modular components for scalable, responsive design.

Tomato (Food ordering app)   **Feb 2025 - Mar 2025**

- Developed a fully responsive food ordering interface inspired by popular delivery platforms, built with React and Vite.
- Implemented dynamic menu browsing, product selection, cart management, and multi-step checkout including payment/address forms.
- Structured the app using modular routing and component-based architecture for maintainability and scalability.

Personal Portfolio Website   **Dec 2024 - Jan 2025**

- Designed and developed a responsive personal portfolio using React to showcase projects, skills, and contact details.
- Implemented smooth navigation, animations, and modular components for clean UI and seamless user experience.
- Optimized for performance, accessibility, and mobile devices to ensure a professional and user-friendly interface.
